broncolor Senso – plenty of power to get started

The Swiss lighting manufacturer presented for the first time at Photokina its newly designed equipment for newcomers and students: the Senso power pack and the Litos lamp.

Besides the innovative design, the new products deliver genuine studio performance for the price of a compact system. Here is a short technical profile:

Senso power pack – fresh light for fresh motifs

Senso A2

Senso A4

Control range

The smaller Senso A2 power pack is controllable from 13 to 1200 J, the larger Senso A4 from 26 to 2400 J, or in 6.5 f-stops (1/1 and 1/10 f-stop intervals).

Power distribution

Symmetric and free asymmetric power distribution (across up to 5 f-stops) over three lamp outlets in two channels.

Power output display

Switchable from f-stops to joules, easy to read due to high-quality LED displays.

Fast times

Short flash duration and charging time (e.g. 0.4 s at minimum output and 1.5 s at maximum flash output with Senso A2).

Colour temperature

Absolutely constant values over three f-stops.

Comfortable

The RFS 2 radio receiver is built in. The RFS 2 allows independent flash release in the same studio on 99 power packs per workstation (max. 99 workstations). All Senso power packs can be triggered via radio over a distance of up to 200 m.

When the power output is reduced, the power pack is discharged internally and does not need to be fired. This means that the selected flash energy is always reliably delivered. The power pack can be switched to slow-charge mode in working environments with weak power grids.

Security components The unit is made of high quality aluminium, and additionally protected by hard rubber components. Reliable application of the unit made possible worldwide by means of a simple mains voltage selector slide switch.

Made in Switzerland

Litos lamp – fresh light with a fresh design

Multifunctional

The protective cap can be quickly converted to be an umbrella reflector or standard reflector to suit the shoot. Built in umbrella holder.

Comfortable

Elegant pan/tilt head for one-hand operation, intelligent cooling system (only switches on when necessary). The lamp is equipped with a release button that allows quick reflector (light shapers) changes and 360° rotation. Ergonomic, new lamp plug.

Expandable

The bayonet is compatible with other broncolor lamps and gives the user access to a comprehensive range of lamps, light shapers, and accessories.

Compact

Handy size, stows away compactly for transport and storage due to small dimensions.

Made in Switzerland

Senso Kit – all included

Light requirements are as varied as photographic assignments. Senso power packs and Litos lamps are available individually and also in four different kits, which are focused on the requirements of the user. The handy travel case accommodates all the kit components and keeps everything organised.

Users have the choice amongst four different equipments.

Senso Kit 21 Article no. 31.052.XX

Includes: 1x Senso A2 power pack, 1x Litos lamps, 1x Softbox Flex 70 x 70 cm (28 x 28 inch), sync cable 5 m (16.4 ft), case.

Senso Kit 22 Article no. 31.053.XX

Includes: 1x Senso A2 power pack, 2x Litos lamps, 1x Softbox Flex 70 x 70 cm (28 x 28 inch), sync cable 5 m (16.4 ft), case.

Senso Kit 41 Article no. 31.054.XX

Includes: 1x Senso A4 power pack, 1x Litos lamps, 1x Softbox Flex 70 x 70 cm (28 x 28 inch), sync cable 5 m (16.4 ft), case.

Senso Kit 42 Article no. 31.055.XX

Includes: 1x Senso A4 power pack, 2x Litos lamps, 1x Softbox Flex 70 x 70 cm (28 x 28 inch), sync cable 5 m (16.4 ft), case.

The Swiss lighting manufacturer and its distributors are offering this equipment at an extremely attractive price.
